

To whom it may concern,

I just wanted to take a moment to inform you of my thoughts on the disturbing news that the government may be directly or indirectly shutting down one of my favorite radio stations. I have a lot of "computer challenged" acquaintances so I feel I speak for many more than just myself. KLOVE in Cincinnati is the only station on the radio that I can get the news and information that I personally feel relevant to my life and priorities without worldly bias. I believe there is a genuine need both personally and publicly to fervently protect one of the last vehicles of delivery that can't be influenced by outside marketing dollars such as KLOVE FM radio! To eliminate the positive input to the community that KLOVE provides would be similar to taking back a life jackets from the passengers of the Titanic. There has to remain some positives out there to offset the numerous negatives! Please don't rock the boat!!
